ABSTRACT

Bronx Community College created a three-year College Discovery (CD) master plan for 1998-2001 to help restructure its counseling programs and support services and enable CD students to acquire an associate's degree level of education. The first area of restructuring is in the role of the director of College Discovery and Counseling. General counseling and the CD program have merged into one program within the Department of Student Development. The director will strengthen the liaisons of counselors with various academic departments, develop professional growth of counselors and a group modality of supervision, enlist counselors as consultants, and advocate an expanded definition of CD participants to include disadvantaged students. Restructuring also includes new staff positions: a supplemental learning instructor, a social worker, a financial aid administrative assistant, a computer technician, CD tutors, and CD peer counselors. New program practices of the master plan include the CD summer pre-freshman program; a CD retention center; an academic advisement, counseling, and registration center; an early alert retention system; block programming of courses and linkage with faculty for high-risk students; pairing of learning-to-learn courses and retention courses; the NewStart program; and a three-year group counseling curriculum. The master plan also includes a research and evaluation program. The second part of the master plan consists of a group counseling curriculum to foster personal growth, self-acceptance, and responsibility among students. The third part focuses on Abraham Maslow's Hierarchy of Needs, which pinpoints different needs to be developed with each progressing school semester. (YKH)

Three-Year College Discovery Master Plan Bronx Community College: 1998-2001

I

Re-structuring for the Third Millennium

Shirley Smith, Ph.D.
Director of College Discovery and Counseling

BRONX COMMUNITY COLLEGE Of The City University of New York Department of Student Development 1998

The Department of Student Development at Bronx Community College has re-structured its counseling programs and support services to enable the third millennium CD students to acquire an Associate Degree-level of education. This re-structuring has taken place in the following areas: (1) the role of the Director of College Discovery and Counseling; (2) new staff positions; (3) new program practices; and (4) a new research and evaluation program.

1. The role of the Director of College Discovery and Counseling
(1998 - 2001)

General counseling and the College Discovery Program have merged into one program within the Department of Student Development. For the third millennium, the Director of College Discovery and Counseling will be:

- (a) A Builder of an educational community. The Director will strengthen the liaison assignments of counselors to various academic departments through the vehicle of paired-courses for retention. The faculty in each academic department will teach a Learning-to-Learn course and his or her counselor partner will conduct group counseling for success.
- (b) A Developer of the professional growth of counselors particularly in group counseling practice, in the multi-cultural modalities of counseling, and in the application of the humanizing, Rogerian approach of empowering students in the classroom.
- (c) A Developer of a group modality of supervision wherein teams of counselors work to help each other grow professionally and who meet 4 times during each semester of the academic year in small-group supervision.

1. The role of the Director of College Discovery and Counseling

(1998 - 2001)

(Continued)

- (d) A "First-Among-Equals" administrator enlisting counselors as consultants or as a "kitchen cabinet" and who meet with him/her monthly to generate innovations or solutions to critical problems.
- (e) An Advocate who sponsors change for an expanded definition of CD students that includes and affirms the new disadvantaged groups of the third millennium: the "vanishing" Afican-American male students; the "vanishing" Hispanic male students; the monolingual ESL students; and, the COPE students i.e., the single-parents on welfare who are forever on the verge of being prematurely assigned out of their college studies into WEP.

2. New Staff Positions

(1998 - 2001)

- (a) Supplemental Learning Instructor acts as a liaison to all the academic support services of the college. He/she will be in charge of recruiting and training tutors. He/she will be working with a counselor in training CD students as peer helpers to fellow CD students. Working with the supplemental instructor, the CD tutors and CD peer helpers will constitute a new force in helping probationary students. The whole program will be located in the CD Retention Center.
- (b) Social Worker will be making referrals for CD students including: AFDC, food

stamps, utility payments, low-income housing, medical assistance, Social Security,

2. New Staff Positions

(1998 - 2001)

(Continued)

Department of Employment Services, and legal services. He/she will also be conducting group sessions over family dysfunction issues, abuse, battering, etc.

- (c) <u>Financial Aid Administrative Assistant</u> will monitor and review financial aid applications, apprise the CD constituency with changes in financial aid policy, and troubleshoot problems that delay the delivery of financial aid to students.
- (d) <u>Computer Technician</u> will input and generate various databases and prepare reports on any particular segment of the CD student population on any number of variables under study.
- (e) <u>CD tutors</u> will help fellow CD students work on their basic skills in writing, reading, and math.
- (f) <u>CD peer counselors</u> will facilitate group sessions helping CD students on academic probation to deal with issues of college survival, academic difficulties, financial and personal problems. Advanced ESL students, in particular, can begin to work with counselors as facilitators in the "conversation workshops" for the basic-or intermediate-level ESL students.

3. New Program Practices

(1998 - 2001)

- (a) <u>CD Summer Prefreshman Program</u> is the most successful "headstart" program in CUNY. The College Discovery Program at Bronx Community College will continue to pursue the <u>consortium</u> enterprise and join the effort of other colleges to incorporate more innovative teaching and counseling practices into the summer program.
- (b) <u>CD Retention Center</u> (see section 1 on Supplemental Instruction) where group sessions on study skills and study habits will be conducted for CD students on academic probation. Together with CD tutors and CD peer counselors, this operation will be the nerve center of the CD program's effort to retain its students.
- (c) Academic Advisement, Counseling, and Registration Center. There will be continued contact with the Center by students. The Center would be a year-round operation and it will emphasize developmental advising: (1) Academic counseling (monitor academic progress: time management, study habits, study skills), (2) personal counseling (establish life goals and explore personal problems), and (3) career planning (relate interests, abilities, and values to career plans).
- (d) <u>Early Alert Retention System</u> (EARS): computerized system of alerting students with regard to their academic status EARLY in the semester. Scantron forms will be processed according to different alert types (frequent absences, lateness,

need for tutoring, need for psychological services, etc.) bubbled in by

3. New Program Practices

(1998 - 2001)

(Continued)

instructors/counselors and followed up for further action by peer helpers via telephone and/or letters.

- (e) <u>Block Programming of courses</u> and <u>Linkage</u> with faculty for high-risk CD students (ENG-01, RDL-01, MTH-01/03) and ESL students (ESL-01, RDL-05, LAN 15). Counselors will offer an orientation and career development course (OCD-01) in conjunction with faculty teaching the remedial courses. For ESL students, OCD-01 will be conducted as a series of "conversation" (English Only) to hasten the "immersion" of ESL students into the writing and speaking of English. Faculty and counselors meet monthly to plan how to better meet the learning and counseling needs of these high-risk students.
- (f) Pairing of Learning-to-Learn course + Retention course: Academic faculty will teach the Learning-to-Learn course (LTL-11) and counselors will conduct group sessions in contract-mediated self-management for success. Faculty and counselors meet monthly to plan how they can further improve their joint effort to increase the retention of students on academic probation.
- (g) NewStart program: intensive individual counseling for (1) re-admitted (previously suspended) students, (ii) probationary students who cannot attend the <u>Paired LTL-11 + Retention course</u>, and (iii) "recidivists" who are in and out of probation.

3. New Program Practices

(1998 - 2001)

(Continued)

(h) A three-year Group Counseling Curriculum (see Part II of the Three-Year CD master plan) and an Individual Educational and Career Plan that monitors and reinforces student progress throughout the six-semester lifecycle of the CD student at Bronx Community College (see Part III of the Three-Year CD master plan).

4. Research & Evaluation Program

(1998 - 2001)

There will be a deliberate integration of a research orientation into program practice. It is the counselor who empirically observes, tests, and reassesses approaches to situations that arise in working with students. Counselors discover and use knowledge in the course of day-to-day activities and seek reliable information to improve practice. They need more direct support in such activities through usable information, and opportunities to translate insights and problem-solving methods into measurable outcome. Counselors are most likely to benefit when they are integrally involved -- when they can formulate questions and use systematic data to develop knowledge they perceive relevant to practical educational concern.

Microsoft ACCESS will generate the database system suited for management and research uses. It can maintain an extensive amount of information on a large number of students, and has

control features which permit a small, nontechnical staff to manage this information with sufficient ease. Individual records can be directly added, updated, reorganized and extracted; tailored listing and summary reports can be produced; and database elements can be selectively joined with additional data elements residing on separate files.

Major advantages of maintaining a database are the comprehensiveness and increased accuracy of information, the speed and ease of reporting and the ability to incorporate new data as necessary for different research problems. Automated data can be instantaneously used for statistical analyses.

Microsoft ACCESS also serves as a tool by which program staff can experimentally investigate and assess specific practices in instruction, counseling, and tutoring. The system facilitates longitudinal analysis and comparison which take into account students' background characteristics as well as their exposure to specific program treatments.

Some of the advantages of using database information to conduct research can be summarized as follows:

- 1. Wide coverage to facilitate generalizability.
- 2. A large enough N to permit a number of simultaneous controls in data analysis.
- 3. A long enough time-series of data to allow analysis before and after a particular intervention.
- 4. The potential for combining files to facilitate the analysis of interventions, the construction of comparison groups, and the generation of histories for individual respondents.

Summary

The iconographies of the third millennium are upon us: the Internet, the sites and chat rooms in the web, and e-mail. They all symbolize the coming together of a global "village." The re-structuring of College Discovery College embodies this collaborative thrust of the third millennium:

- The Director of College Discovery and Counseling strives to create an educational community from among counselors and between counselors and academic faculty.
- The new staff positions, particularly those of the CD tutors and CD peer counselors, reflect the effort to "give back" to the CD program and the college community.
- 3. The new program practices are infused with a group counseling approach and characterized by block programming of courses and linkage with faculty to increase student retention.
- 4. CD counselors contribute directly to a shared informational database, which they also use to make program decisions and conduct analytical research. This collaborative relationship between research and educational practice can encourage more active inquiry, experimentation, and assessment by CD counselors as program practitioners.

Student development counseling is an ongoing process which can take place at any point in a student's life and may occur throughout the student's stay in college (Erikson, 1982). The emphasis in such counseling is on helping students achieve positive personal growth regardless of the stage of development in which they find themselves (Drum, 1990). Instead of being crisis-oriented, student development counseling is preventive in nature (Hamachek, 1995). The counselor tries to help the student achieve self-understanding and greater awareness and appreciation of his or her potential as a developing person (Heath, 1990). Self-acceptance is fostered as well as the ability to make greater use of capabilities. Counselors help student develop their capabilities to the greatest extent possible (Loxley and Whiteley, 1996). One aspect of such development is the acceptance of more responsibility for one's behavior and actions, and for the decisions and choices which must be made regarding one's education and career (Whiteley, 1992).

I. Group Counseling Approach

Group counseling is a very useful vehicle for student development counseling (Bloom, 1991). Methods can include several kinds of group work, such as sessions to orient students to college and inform them of instructors' expectations. College Discovery at BCC has chosen to develop group counseling units known as Orientation and Career Development (OCD) courses. Other sessions of group counseling might include career planning and development. Films, guest speakers and workshops are all methods which can be used effectively to promote group counseling for College Discovery (CD) students. Group methods tend to be effective since change and acceptance of change can be facilitated through group interaction and feedback, the

exploration of feelings, and group support and positive reinforcement (Bowman, 1987)

Some of the major areas of concentration in a comprehensive CD group counseling program might include such things as orientation to college, goal-setting and decision-making, career exploration, educational planning and personal/social/educational and academic problem-solving. Other areas might deal with preparation and financial planning. Such information is most effectively imparted to students through a group counseling program, although use can be made of individual counseling, information giving and referrals as well. The advantages of group counseling include the following:

- a. The possibility of CD students receiving feedback from peers.
- b. The opportunity for CD students to gain and share knowledge and awareness of various options in their lives.
- c. The opportunity for better self-understanding through the group process.
- d. The chance to explore the personal relevance of career options through the group interaction.
- e. The opportunity to make and evaluate decisions.
- f. The chance to put plans into action and to evaluate the consequences.
- g. The opportunity to assess and receive feedback regarding the suitability of decisions (Corey and Corey, 1988: Trotzky, 1989).

Basically, the various aspects of a group counseling program serve the purpose of providing a small group structure through which the essentials of counseling can be achieved. Such a structure enables counselors to reach more students and provides students with specific information which they need to have. At the same time it offers a forum for discussion of mutual problems and solutions to problems. All this can be done in a systematic way as part of the CD group counseling curriculum.

II. Maslow's Theory of Motivation

As the counseling field has become more attuned to the <u>developmental</u> perspective in student counseling, there have been increased efforts to provide training and information about intervention in the student's life development to the counseling practitioner. Unfortunately, most of the existing literature has remained decentralized, is often contradictory, and is generally unconnected in its implications for counseling interventions at different stages in the student life cycle.

Gaining a comprehensive view of the kind of interventions suggested by student development theorists and researchers can be an overwhelming task (Winston et al., 1987).

Typically the busy practitioner has little time to separate fact from fiction or data from speculation and make sense out of this conceptually cluttered and frequently contradictory literature.

Maslow's theory of hierarchical needs underlies all the themes basic to all frameworks of student development (Winston et al., 1987). Maslow (1954) arranged the basic human needs in a hierarchy, i.e. according to their urgency and importance. Students strive to fulfill or satisfy one or several of these human needs.

Needs Category

PHYSIOLOGICAL needs. People need food, shelter, and clothing to stay alive. These are survival needs.

SAFETY needs.

People need to feel safe
from danger (physical safety)
and safe from things that
are upsetting (emotional safety)

LOVE-BELONGINGNESS needs. People need to belong, to be with other people, to be loved to be liked, to be accepted. They want to feel they are important to others.

ESTEEM needs.
People need respect from other people. They need to be proud of themselves and that other people are proud of them. They want other people to admire them and what they do.

SELF-ACTUALIZATION needs. People need to feel satisfied with themselves. This satisfaction can come from doing a good job, finding new interests, gaining and finding new meaning in life.

Students' Needs

Money, tuition, food health, clothes, books car fare, passing grades.

Adequate study habits and study skills; have focused career goals; avoid academic probation and academic suspension.

Peer associations; facultystudent interactions; clubs activities; acceptance in group.

Advancement based on academic achievement
Honors
Positive feedback from
Instructors.
Respect from peers and instructors.

Unique accomplishments Increasing responsibility. Independence of action. Initiative in setting goals And standards. Community service.

The principles of <u>prepotency</u> and <u>reversibility</u> govern the dynamics of this ladder of needs. Prepotency means that a basic, lower need must first be satisfied before an individual can "climb" to the next higher need. A student suffering from flu is far more concerned in recovery (Survival needs) than in being accepted or loved by his or her classmates (Love-Belongingness needs). Reversibility postulates that any given stage is vulnerable to a prepotent need of a previous stage and the individual must "return" to take care of the need of the previous stage so that he or she can maintain the "threatened" stage. An honor student who begins to get failing grades will have

to take care of tuition, book money, and health needs (Survival needs) before he or she can refocus on getting A grades in his or her courses (Self-Esteem needs).

The Three-Year Group Counseling Curriculum for Educational and Career Development is schematized along five dimensions: (a) based on Maslow's theory of motivation, a description of students' hierarchy of needs which recapitulate the basic themes and dynamics of student development; (b) a description of entry points for counseling interventions through the OCD courses at different time frames in the student's life cycle; (c) teams of counselors assigned to each of the three years of the CD student's life cycle at Bronx Community College; (d) an Individual Educational and Career Plan (IECP) which is designed to monitor and reinforce the progress of the CD student through the six semesters of the three-year plan; and (e) the use of Microsoft ACCESS to generate a database from which outcome and process variables can be collected and analyzed.

<u>SURVIVAL NEEDS</u>: Students seek information about the totality of the college experience: about classes, quizzing other students or counselors as to what to major in or how to obtain financial aid. This process is healthy, since it helps reduce anxiety and tell them what to do in order to survive in college.

First semester*

Group counseling	Toom of Counselors	IECP	Research &
Intervention	Team of Counselors	IECP	Evaluation
Computer Assisted-Interactive & Multi-Media Supported Programs on survival issues in college (see Appendix A)	A team of counselors will conduct group counseling sessions on college survival as part of a block- program + linkage with faculty (see Appendix A)	1 st -semester* Plan of Survival (see IECP)	Outcome: GPA Credits completed Retention Process: How & Why learning
Early Alert Retention System (EARS) (see Appendix B)	A team of counselors will conduct "conversations" with ESL students in group counseling sessions on college survival as part of a block-program + linkage with faculty (see Appendix A)		occurred? How & Why counseling worked?

^{*}The CD Pre-Freshman summer sessions can be considered the first semester in this model. Bronx Community College has joined a <u>consortium</u> of other CUNY units in a CD Pre-Freshman summer program proposal for state funding. The <u>consortium</u> proposal incorporates the innovative teaching and counseling approaches featured in this three-year CD Master Plan.

<u>SAFETY NEEDS</u>: One of the most disruptive features in college life is failing to have some notion of what is ahead, for it to be utterly unpredictable and uncertain. Some students are good at using the past as an excuse for their failure. Control makes students feel better if they can have a sense of what is ahead. They are able to map out how they will change and grow, then proceed planfully, guided by rational choice, to live out their personal prophecies.

Second semester

Group counseling			Research &
Intervention	Team of Counselors	IECP	Evaluation
-			
Noel-Levitz	A team of counselors	2 nd -semester	Outcome:
Retention	will conduct group	Retention	GPA
Management System*	counseling sessions	Plan (see	Credits
(OCD-01 course)	in OCD-01 as part of	IECP)	completed
for regular CD	a block-program +		Retention
students and	linkage with faculty		Process:
CD students on	(see appendix C)		How & Why
ACADEMIC PROBATION (see Appendix C)			learning occurred?
••	A team of counselors		How & Why
Early Alert	will conduct		counseling
Retention System	"conversations" with		worked?
(EARS)	ESL students in group	*	
(see Appendix B)	counseling sessions		
	in OCD-01 as part of		
	a block-program +		
	linkage with faculty		
	(see Appendix C)		

^{*}Noel-Levitz have devised a survey and were able to extract from the responses to the survey a "proneness" profile to attrition. The "proneness" profile has several indicators that alert student and counselor into taking steps to prevent attrition.

<u>SAFETY NEEDS</u> (Continued): To feel secure and stable, students must have synthesized knowledge about themselves and the world of work into appropriate career plans, both making an emotional commitment and taking steps now to allow realization of career goals.

Third semester

Group counseling Intervention	Team of Counselors*	Research & IECP Evaluation
Career & Occupational course (see Appendix D)	A team of counselors will conduct group counseling sessions in OCD-11	3 rd -semester <u>Outcome</u> Career & GPA Occupational Credits Plan (see IECP) completed Retention
	A team of counselors will conduct "conversations" with ESL students in group counseling sessions in OCD-11 (see Appendix E)	Process: How & Why learning occurred? How & Why counseling worked?

^{*}A team of six counselors will follow the CD student's life-cycle in college. Two counselors will be assigned to the First-Year Cycle, the next two counselors to the Second-Year Cycle and the remaining two counselors to the Third-Year Cycle as CD students "spiral up" toward graduation.

<u>LOVE-BELONGINGNESS</u>: Students must have developed relationships with peers characterized by trust and willingness to assume meaningful responsibility for assisting others to learn or become more mature.

Fourth semester

Group counseling Intervention	Team of Counselors	IECP	Research & Evaluation
Study Groups on Academic Learning (see Appendix F)	A team of counselors will conduct study groups on Academic Learning CD tutors and CD peer helpers will assist counselors in the CD Retention Center*	4th-semester Academic Plan (see IECP)	Outcome: GPA Credits completed Retention Process: How & Why learning occurred? How & Why counseling worked?

^{*}The Supplemental Learning Instructor will train CD tutors. Counselors will train CD student volunteers in peer counseling. The CD tutors and the CD peer helpers will constitute a new force in helping probationary CD students. The program will be located in the CD Retention Center.

ESTEEM NEEDS: Self-esteem means that students have a positive self-image of themselves. Students sustain an inner assurance that they can accomplish whatever may be necessary in successful adaptation. Students sense a clear continuity between themselves, their parents and other family members. Despite periods of occasional turmoil or upset, they are able to find ways to continue performing successfully in the academic environment, utilizing past competencies to cope.

Fifth semester

Group counseling Intervention	Team of Counselors	IECP	Research & Evaluation
Self-Esteem Building* (see Appendix G)	A team of counselors will conduct group counseling sessions on Self-Esteem Building	5 th -semester Plan for Self- Esteem Building (see IECP)	Outcome: GPA Credits completed Retention Process: How & Why learning occurred? How & Why counseling worked?

^{*}The Department of Student Development may want to develop the syllabus on Self-Esteem Building into an experimental course and propose the course to the College's curriculum committee as OCD-13.

<u>SELF-ACTUALIZATION NEEDS</u>: Students see their lives as "success" stories, consider their chosen careers as fulfilling their values, and are now ready "to give back" to the college and community.

Sixth semester

	<u> </u>		
Group counseling Intervention	Team of Counselors	IECP	Research & Evaluation
Success	A team of counselors	6 th -semester	Outcome:

(see Appendix I)	student volunteers	,	counseling
(see Appendix I)	in peer counseling		worked?
	in peer counseinig		WOIKEU!

^{*}The Department of Student Development may want to develop the syllabus on Writing Success Scripts into an experimental course and propose the course to the College's curriculum committee as OCD-14.

Summary

Part I established our preferred approach to counseling. The curriculum adopts the group counseling approach as one of the most effective intervention techniques for the retention of CD students.

Part II gave a brief overview of Maslow's themes underlying the myriad developmental tasks students must successfully negotiate during their life cycle as students. This will sharpen counselor assessment on the current and historical status of students' growth and development according to Maslow's model.

Part III charted issues derived from Maslow's model of a hierarchy of needs which can lead to goal setting and planning for college success and retention. Time frames are permeable and tasks are highlighted that are likely to be associated with that semester. It would be an error to accept stages or periods as fixed and uninfluenced by individual differences. There are many factors that make it almost impossible to present an accurate rendering of the life course for any individual student.

Microsoft ACCESS will provide the CD program administration with better information on how program services are being delivered and enable the administration to improve program accountability. Are students receiving services appropriate to their needs? Is the distribution of services equitable? Are program operations efficient? Using their information, teaching, counseling, and tutoring practitioners can better follow individual students' progress over time and at critical points where intervention may be necessary. For example, the database will make it easier to identify students who are at risk of withdrawal, academic failure, or loss of financial aid. Preventive action can then be taken. Microsoft ACCESS also serves as a tool by which program staff can experimentally investigate and assess specific practices in instruction, counseling, and tutoring — how they are implemented and how they relate to student learning. Such an

investigation should give us insight into the processes that produces changes in students, and the reasons for these changes. Then we may better specify the properties of the program environment as well as interactions in that environment that can be linked to successful student outcomes.

The chart summarizes the main thrust of the group counseling curriculum. We hope that this framework can serve an organizing and heuristic function for those who adhere to a theory of student development. In addition, we hope it will aid the CD counselor in developing a more comprehensive understanding of the student life course: its rhythms, cycles, seasons, and markers. Such an understanding can further our interventions with students, legitimize studenthood as a time of growth and change, and provide a framework for systematic assessment and facilitation of student life changes.

APPENDIX B

Early Alert Retention System (EARS)

The model known as Early Alert Retention System (EARS) is proposed for adoption in the fall of 1998. It is a first step in identifying students who may be experiencing anxiety or frustration resulting from academic or other difficulties, and is a referral vehicle for those students to appropriate resources for help.

The process

The instructor initiates the process by filling out a scantron card and shading off the pertinent categories for referral:

~	-	_
TL	DI	м
10	\mathbf{r}	VI.

DEFINITION

ALERT

An alert is any of the options checked by an instructor when completing an early alert scantron form. For each student, an instructor could check one or more of the following alerts:

- 1) OK student doing alright
- 2) R student needs remedial skills
- 3) S student needs study skills/time Management
- 4) T tutoring
- 5) C counseling
- 6) A class attendance needs improvement
- 7) M missed too many classes, should drop
- 8) W student has withdrawn from this class

OK - Alert

OK or W alerts are counted as OK-alerts.

NOT - OK alert

Alerts other than OK or W are counted as NOT-OK alerts.

PASSRATE

Passrate is a numerical index which describes the rate at which student successfully passed their courses (A, B+, B, C+, C, D+, D, P). Early semester drops as well as W are not included in the computation of passrate.

The EARS scantrons are forwarded, via messenger service*, to the department of Student Development where counselors/peer helpers will attempt to contact the student by telephone.

^{*}Student aides, on each Thursday of the week, will pick up the scantron forms from faculty in the various departments involved with EARS.

When contact is achieved, the student is informed of the instructor's concern for the student's successful achievement in the particular course(s). The student is also told of the various support services that are available such as personal counseling, academic advisement, educational and career advisement, individual tutoring available for subject areas, audio-visual sets on study skills. The student is notified of the last day to drop the courses and is also urged to make an appointment to see a counselor, to return to class(es), and to speak with the instructor making the referral.

If the student is not contacted by telephone, the department of Student Development will send a letter requesting that the student call or visit the Counseling office and the instructor (See Appendix C).

In either case, the instructor is informed of the results of the contact through a <u>Report Form</u> and a duplicate of this form is placed in the student's file. Approximately one week is allowed for action to be taken from initial referral through the follow-up to the instructor.

It is essential that the faculty receive thorough training on the system in order for each instructor to understand and recognize the signs of anxiety and frustration. They are then able to make the appropriate referral through the system. When the instructional division and counseling department each understand their responsibilities for each step of the process, the counselors/peer helpers will be able to make timely contact with the students and help them address their issues before they become problems.

APPENDIX C

Orientation & Career Development Course (OCD-01)
Syllabus
(Based On Noel-Levitz Retention Management System)

Innovative features:

- (1) Utilization of Noel-Levitz strategies for retention of CD and ESL students who are at their most vulnerable in the second semester when they usually place themselves on ACADEMIC PROBATION.
- (2) Counselors will conduct "conversations" in groups (English Only) with ESL students on strategies for retention so that these students can persist in college.
- (3) BLOCK programming of courses and LINKAGE between counselors and faculty working to forge a learning community that meets monthly to discuss how to provide for the learning and counseling needs of CD and ESL students who may be on ACADEMIC PROBATION.

MODULE I - Educational Planning SUCCESS ON DEMAND How To Ask for Help GIVING YOURSELF A CHANCE TO LEARN

Careers and Occupations Course (OCD-11) Syllabus

Innovative features:

- (1) Utilization of computer program SIGI for career and occupational exploration.
- (2) On-line utilization of INTERNET for job search in the WEB and the practice writing of resumes.

Module I

Sources of Employment **Initial Contacts with Employers** Writing a Resume Preparing for an Interview Module II Adjustment to Work You & Your Supervisor You & Other Workers Module III Learning Successful Job Actions Learning How To Judge Yourself On The Job Learning How To Prepare For **A Promotion** Learning How To Ask For A Raise Or Promotion Module IV Learning How To Set Up A Good Job Reference

Learning The Wrong Way To

Learning How To Resign

Leave A Job

APPENDIX E

Careers and Occupations Course (OCD-11) for ESL students Syllabus

Innovative features:

- (1) Utilization of computer program SIGI for career and occupational exploration.
- (2) On-line utilization of INTERNET for job search in the WEB and the practice writing of resumes.
- (3) "Conversations" in groups (English Only) with ESL students on careers and occupations.
- (4) Advanced ESL students will begin to work with counselors as facilitators in the "conversation" workshops held for basic-or intermediate-level ESL students.

Module I

Career Profile (SIGI) Resume (Computer Lab) Interviewing (Case Studies) Module II Be on Time Be Responsible Stick to Schedule Module III **Follow Directions** Be Friendly & Helpful Remember, Business Comes First Keep Yourself Busy Module IV Take Criticism Wisely Leave Your Blues At Home Get Along with Others Take Pride in Your Work Module V Don't Argue with Your Boss Above All, Be Honest

APPENDIX F

Study Groups: A Counseling Strategy to Promote Academic Success

- <u>Innovative features</u>: (1) Utilization of group process and group dynamics to create a support network for students.
 - (2) Students utilize each other's strengths to acquire and practice learning skills.
 - (3) Probationary students will be required to participate in these study groups.
 - (4) CD tutors and CD peer counselors will assist counselors in working with probationary CD students.

The study groups meet once a week for two hours for ten weeks. These groups are not credit-bearing, but attendance is mandatory. The groups are conducted by two counselors. The aims of the groups are: (1) examine some of the problems and causes of poor academic performance leading to academic probation; (2) to develop support systems in peer groups that might be used as a means of helping these students gain insight into effectively understanding their role as students; (3) to develop coping strategies that might be used to overcome academic difficulties; (4) to develop an ongoing, structured intervention to curtail poor academic performance.

Topics for discussion will include note taking, systematic reading, vocabulary building, concentration, recalling learned material, term papers and test taking. Assignments such as keeping scheduled diaries, keeping vocabulary cards and utilizing support services, will be given to reinforce information covered during each session. At the initial group session the students will be asked to sign a contract. In the contract, they will indicate strategies they would employ to improve their learning abilities and grade point averages. Students will be given a copy of the contract to serve as a reminder of what they had agreed to do.

Group structure creates an atmosphere where students feel free to discuss other concerns and problems affecting their academic performance, including the offering of support and advice to help each other. The feedback during discussions and participation in group assignments will inevitably create positive feelings about being in the group.

During the final session, students will be given a questionnaire which attempts to ascertain their perceptions of the group experience. These perceptions will be compared with their actual performance at the end of the semester.

APPENDIX G Self-Esteem Building (Syllabus)

Innovative features:

- (1) Before-After comparison of Self-Esteem measures of CD students.
- (2) Correlate positive changes in Self-Esteem of CD students to their academic success.
- (3) CD Students will join Honors society and consider becoming a tutor or peer counselor.

Module I - - SECURITY: A feeling of strong assuredness. Involves feeling comfortable and safe; knowing what is expected; being able to depend on individuals and situations; and comprehending rules and limits.

Unit I: Build a Trusting Relationship

Unit 2: Set Reasonable Limits and Rules That Are Consistently Enforced

Unit 3: Create a Positive and Caring Environment

Module II - SELFHOOD: A feeling of individuality. Acquiring self-knowledge, which includes an accurate and realistic self-description in terms of roles, attributes and physical characteristics.

Unit 4: Reinforce More Accurate Self-Descriptions

Unit 5: Provide Opportunities to Discover Major Sources of Influence on the Self

Unit 6: Building an Awareness of Unique Qualities

Unit 7: Enhance Ability to Identify and Express Emotions and Attitudes

Module III - AFFILIATION: A feeling of belonging, acceptance or relatedness in relationships that are considered important. Feeling approved of, appreciated and respected by others.

Unit 8: Promote Inclusion and Acceptance Within the Group

Unit 9: Provide Opportunities to Discover the Interests, Capabilities and

Backgrounds of Others

Unit 10: Increase Awareness and Skills in Friendship Making

Unit 11: Encourage Peer Approval and Support

Module IV - MISSION: A feeling of purpose and motivation in life. Self-empowerment through setting realistic and achievable goals and being willing to take responsibility for the consequences of one's decisions.

Unit 12: Enhance Ability to Make Decisions, Seek Alternatives and Identify

Consequences

Unit 13: Aid in Charting Present and Past Academic and Behavioral Performances

Unit 14: Teach the Steps to Successful Goal-setting

APPENDIX G

Self-Esteem Building* (Syllabus) (Continued)

Module Y - COMPETENCE: A feeling of success and accomplishment in things regarded as important or valuable. Aware of strengths and able to accept weakness.

Unit 15:	Provide Opportunities to Increase Awareness of Individual Competencies
	and Strengths
Unit 16:	Teach How to Record and Evaluate Progress
Unit 17:	Provide Feedback on How to Accept Weakness and Profit from Mistakes
Unit 18:	Teach the Importance of Self-Praise for Accomplishments

^{*}The Department of Student Development may want to develop this syllabus into an experimental

course and propose the course to the College's curriculum committee as OCD-13.

APPENDIX H

Re-Writing the Scripts by Which Students Live*
According to Each Student's Cultural Narrative
(Syllabus)

<u>Innovative features</u>: (1) Helping CD students re-write stories of failure into stories of success.

(2) Exploring cultural values and traditions that shaped the success stories of CD students.

Old Scripts	New Scripts
1. I GOT FS' SO THERE IS NO POINT IN TRYING.	I AM NOT GIVING UP ON MYSELF.
2. I GET NO BREAKS AT ALL.	I CAN USE SOME HELP.
3 I HAVE ENEMIES AND THEY ARE USUALLY MY TEACHERS.	I AM GOING TO FIGHT FOR WHAT I DESERVE.
4. I CAN'T SAY NO!	I'LL LOOK OUT FOR MYSELF.
5. I AM NOT SURE WHAT I REALLY WANT FROM COLLEGE.	I KNOW WHERE I AM GOING.
6. I LET THINGS GET IN THE WAY.	I LET GO OF WHAT GETS IN THE WAY
7. I DON'T GIVE MYSELF ENOUGH CREDIT.	I CAN MAKE IT.
8. I HAVE TO DO THINGS MY WAY.	I PLAY BY THE RULES.
9. I PUT MYSELF DOWN.	I MAKE THE MOST OF WHAT I HAVE.
10. I DO NOT HAVE A GOOD TRACK RECORD.	I CAN SHAPE MY FUTURE.
11. I NEVER SEEM TO GET IT RIGHT.	I CONTROL WHAT I AM DETERMINED TO CHANGE.

^{*}The Department of Student Development may want to develop this syllabus into an experimental course and propose the course to the College's curriculum committee as OCD-14.

APPENDIX I

PEER POWER (Book I, Workbook by Judith A Tindall, Ph.D.)

Innovative features:	(1)	Challenge CD students' self-actualization needs so that they are	
		engaged in some form of a "giving back" to the College.	
	(2)	Channel the "giving back" into peer counseling and helping fellow	V
		CD students.

Individual Educational and Career Plan

(IECP)

Dr. Emilio Santa Rita

Bronx Community College Of the City University of New York Department of Student Development 1998

Individual Educational & Career Plan (Based on Maslow's Hierarchy of Needs)

SELF-ACTUALIZATION

needs: to share one's talents and extend oneself in helping others.

(Sixth semester: pp. 20-22)

SELF-ESTEEM needs: the need to be respected and appreciated. (Fifth semester: pp. 16-19)

LOVE-BELONGINGNESS nneds:

Study groups to create networking and support in acquiring learning skills. (Fourth semester:pp. 13-15)

SAFETY needs (Continued): Matching Personality Types, Interest Profiles, Abilities, and Values to a career. (Third semester: pp. 6-12)

SAFETY needs: Adequate Asking-for-Help Plan; Self-Care Plan; Study Plan; and Career Motivation Plan. (Second semester: pp. 3-5)

SURVIVAL needs: Money, tuition, food, health, clothes, books, transportation and minimum GPA to avoid academic probation.

(First semester: pp. 1-2)

Name

First Semester

Survival Needs:

I need TAP to continue paying for my tuition next semester.

I need PELL for books and personal expenses.

I need to maintain a GPA that will help me avoid academic

probation.

USE INTERACTIVE SUCCESS PROGRAM IN COMPUTER-ASSISTED COUNSELING LAB (Loew Hall 320)

TAP

1.	The minimum number of cumulative degree credits I need to pass and complete so I can have TAP next semester:
2.	The minimum cumulative degree GPA I need to obtain so I can have
2.	TAP next semestr:

Second Semester

Safety Needs:

I need to have an Asking-for-Help Plan, a Self-Care Plan, aStudy Plan, and a Career Motivation Plan to make sure that I stay in

college.

I. ASKING FOR HELP PLAN

For what are you trying to achieve, what kind of support do you have? How helpful are you to yourself? Who are your partners and friends?

The ASKING FOR HELP PLAN will help you determine to what extent you reach out to others when you need help to resolve problems.

DIRECTIONS: Read each statement below. Then, under ONI: of the three columns, check either "Often", "Sometings", or "Never or Seldom".

Never or Seldom

Sometimes

Often

My friends know when not to call me on the

phone.

7

I let my classmates know when they make

too much noise in class.

DIRECTIONS: Read each statement below. Then, under ONE of the three columns, check either "Often", "Sometimes", or "Never or Seldom".

The SELE-CARE PLAN will help you determine if you hook after yourself and take care of

your needs.

Do you have the ability to balance giving with taking, helying with asking for help, caring

II. SELF-CARE PLAN

with getting something back from your family, friends, and classmates?

		Often	Sometimes	Never or Seldom
	I talk to my professor when his/her lesson is not clear to me.		[]	
-2	I talk to my professor when I have problems in class.			
m.	I ask my professor how I am doing in class.	[]		=
4.	I ask my professor what extra work I can do to get an A or P grade.	-	_	=
٠	I talk with my counselor when I have problems coping with the demands of college work.	_	[]	
6.	I talk with my counselor to discuss my career plans.		_	
7.	When necessary, I use the tutoring programs available at the College.			[]

I exchange lecture notes with my classinates

to see what I missed

I study with classmates who are serious

students.

I postpone running errands for family

members when I need to study.

I spend time with students from whom I can

learn.

I contribute to class discussions.

ACTIVITY 1: Look at the total number of "Often" checks. The higher the total, the farther you are from placing yourself on academic probation. Now, select ONE "Never or Seldom" statement that you plan to work on so that you can improve your ability to ASK FOR HELP. Write it below.

8. I know when to get off the phone and return
[] [] [] [].

ACTIVITY 2: Look at the total number of "Often" checks. The higher the total, the farther you are from placing yourself on academic probation. Now, select ONE "Never or Seldom" statement that you

plan to work on so that you can improve your ability to TAKE CARE OF YOUR OWN NEEDS. Write

it below.

48

Second Semester

I need to have an Asking-for-Help Plan, a Self-Care Plan, a Study Plan, and a Career Motivation Plan to make sure that I stay in college.

III. STUDY PLAN

You may have a satisfactory place to study, and a suitable study schedule, but, nevertheless, you discover that, almost before you realize it, your study time has passed. You try to remember what you have learned, only to find that it comes to very little.

This Study Plan will help you determine how well you organize your study time and

DIRECTIONS: Read each statement below. Then, under ONE of the three columns, check either "Often", "Sometimes", or "Never or Seldoun".

١				
		Often	Sometimes	Never or Seldom
<u></u> :	I take time to organize my study, home, and work schedules.	- 1		[]
2.	I study at least three hours per day, seven days a week.	_	-	[]
3.	When I read, I turn headings into questions, and I'try to answer my questions.	_	-	[]
4.	I review my classnotes every night before I go to bed.	_	[]	
5.	I begin to work on reports, term papers, and homework assignments as soon as I receive them.		Ξ	
و	I review daily so I don't have to cram before tests.			
7.	7. I make up a sample test for myself and try to answer it.	[]	Ξ	

ACTIVITY 3: Look at the total number of "Often" cheeks. The higher the total, the farther you are from placing yourself on academic probation. Now, select ONE "Never or Seldom" statement that you plan to work on so that you can improve your STUDY PLAN. Write it below.

IV. CAREER MOTIVATION PLAN

Motivation is a strong desire to succeed. It means ambition - the desire to reach a goal. Do you know what to do after college? Do you relate your studies to your future career? The Carcer Plan will help you determine how well you relate college with your future career.

DIRECTIONS: Read each statement below. Do you agree with the statement? If so, place a check mark in the "I Disagree" column. If you disagree, place a check mark in the "I Disagree" column. If you are unsure, place a check mark in the "I Don't Know " column.

		1 Agree	1 Disagree	1 Don't Know
[- -	I intend to work hard in college to get good grades.	[]	[]	
2.	I plan to take courses that will prepare me for work in the future.	Ξ		
٠;	I need a college diploma to succeed.			[]
4.	I need academic skills to get a job.		Ξ	Ξ
5.	The type of job I can get will depend on what I know and what I can do.	2		Ξ
9.	The type of job I want will require study and work on my part.			
7.	I plan to have a better work life than my family.			

ACTIVITY 4: Look at the total number of "I Agree" clecks. The higher the total, the farther you are from placing yourself on academic probation. Now, select ONE "I Disagree" statement that you plan to work on so that you can improve your CAREER MOTIVATION. Write it below.

Third Semester

I need to match my Personality Type, my Interest Profiles, my Abilities, and my Values to decide on a career that will motivate me to stay in college. Safety Needs (Continued):

1. PERSONALITY TYPES AND MY CAREER

I. PERSONALITY TYPE AND MY CAREER (Continued)

Likes solving new problems; dislikes doing the same thing repeatedly; enjoys learning a new skill more than using it, works in bursts of energy powered by enthusiasm, with slack periods in between; reaches a conclusion quickly; impatient with routine details; is impatient with complicated situations; follows Works best when able to plan work and to follow the plan; likes to get things settled and finished; may decide things too quickly; may dislike to interrupt the project for a more urgent one; may not notice new things that need to be done; wants only the essentials needed to begin work; tends to be satisfied once a have difficulty finishing them; may postpone unpleasant jobs; wants to know all Adapts well to changing situations; does not mind leaving things open for changes; may have trouble making decisions; may start too many projects and about a new job; tends to be curious and welconnes new light on a thing, situation, ACTIVITY 1: List your personality types in the left-hand column. Review chapter five in Getting Set for Success by Emilio Santa Rita and/or other materials assigned by your counselor. Then, in the righthand column, write one or more possible curricula/occupations that match one or more of your inspiration; frequently makes errors of fact; dislikes taking time for precision. CURRICULA/OCCUPATIONS udgement is reached on a thing, situation, or person. PERSONALITY TYPES [] Unstructured: [] Structured: personality types. | | Infuitive: Likes variety and action; tends to be fast, dislikes complicated procedures; often good at greeting people; is impatient with long, slow jobs; interested in the results of a job, in gelting it done, and in how other people do it; often does not mind the interruption of answering the telephone; acts quickly, sometimes without thinking; statements; has trouble remembering names and faces; tends not to mind working Likes quiet fot concentration; tends to be careful with details, dislikes sweeping on one project for a long time without interruption; is interested in the idea behind the job; dislikes telephone intrusions and interruptions; likes to think a lot before acting, sometimes without acting; works contentedly alone; has some problems Does not show emotion readily and is often uncomfortable dealing with people's feelings; may hurt people's feelings without knowing it; likes analysis and putting impersonally, sometimes paying insufficient attention to people's wishes; needs to be treated fairly; able to reprimand people or fire them when necessary; is more likes harmony; often lets decisions be influenced by own or other people's things into logical order; can get along without harmony; tends to decide personal likes and wishes; needs occasional praise; dislikes telling people analytically oriented - responds more easily to people's thoughts; tends to be firm-Tends to be very aware of other people and their feelings; enjoys pleasing people; Check all the personality types, listed below, that describe how you usually think, act, or make ikes to have people around; usually communicates freely. communicating. choices in ordinary life situations. minded. [] Extrovert: | | Introvert: [] Thinking: [] Fecling:

BEST COPY AVAILABLE

Dislikes new problems untess there are standard ways to solve them; likes an established way of doing things; enjoys using skills already learned more than

learning new ones; works steadily, with realistic idea of how long it will take; usually reaches a conclusion step by step; patient with routine details; is impatient when the details get complicated; ræely inspired and rarely trusts inspiration;

seldom makes errors of fact; tends to be good at precise work.

unpleasant things; is people-oriented; responds more easily to people's values;

tends to be sympathetic.

| | Practical:

Safety Needs (Continued):

I need to match my **Personality Type**, my **Interest** Profiles, my **Abilities**, and my **Values** to decide on a career that will motivate me to stay in college.

II. INTERESTS AND MY CAREER

JIZIIC
REAL

Check your three (3) main INTEREST PATTERNS:

Realistic people enjoy physical activity, work with their hands, or heavy work requiring strength and endurance. They often like to work outdoors.

INVESTIGATIVE

Investigators enjoy asking the questions <u>Why?</u> and <u>How?</u> in their work. They like to work with scientific or technical information, applying it to new situations.

ARTISTIC

Creative people like to feel free from scheduled routines so that time can be used for creative activities. They express themselves through music, drama, writing, or art.

SOCIAL

Service workers enjoy activities that involve informing, training, teaching, understanding, and helping others. They find their job satisfaction in helping others.

ENTERPRISING

Persuaders like to work and talk with people and enjoy convincing others to see things their way. Their success is measured by how well they influence others.

Third Semester

I need to match my Personality Type, my Interest Profiles, my Abilities, and my Values to decide on a career that will motivate me to stay in college. Safety Needs (Continued):

IDENTIFY YOUR WORK VALUES: STEP 2. What are your Work Values? Some examples of work values might be starting salary, benefits, promotional opportunities, minuber of job openings, work schedule, job security, travel involved, prestige, independence, level of responsibility, chance to help others, or chance to be creative.

Example of identifying the Work Values for Making a Decision:

Susan is a single parent. She has two children, both in grade school. She needs an occupation that would keep her close to her family and give her a stable income so she could get off welfare. She also wants to be recognized and appreciated for her wo leaving her growing children with baby-sitters.

Susan has identified her options and the occ identify her work values - what she wants and what sl

Susan's work values are:

- A job close to home;
- A stable income;
- Recognition and appreciation from co-worker
- Reasonable number of years of study in college.

What are your four (4) MOST IMPORTANT Work Values? (See p. 13)

Occupation Selected × Short Years of Study + Recognition <u>u</u> ည

Susan evaluates each of the occupations she has found against her work values. She places a plus (+) mark on the chart to indicate that an occupation meets a work value. She enters a minus (-) mark if an occupation does not meet a work value. She leaves the cell blank if the occupation neither adds to nor detracts from the work value. Susan then selects the most desirable occupation.

Susan decides to become a Medical Laboratory Technician. The four plus marks show that this choice meets and reflects all of Susan's work values.

MAKE A DECISION CHART: STEP 3.

Self-Actualization Needs:

To fulfill my self-actualization needs, I have to rewrite the old scripts of the past into new scripts of success.

Several historical points below indicate where yu had been (story of failure) amd where you can do (story of success). Indicate on a continuum of LOW (I sometimes feel I am still there) to HIGH (I have definitely made it!) your current story..

	Old Scrip	ts					1	Vew	Scri	ipts	
1.	I got Fs so the	ere is	not po	int in t	rying.	1	l am no	ot givi	ng up	on myself.	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
2.	I get no breal	ks at a	ш.			1	l can u	se son	ne help).	
	LOW 1	2	. 3	4	5	6	7	8	9	10 HIGH	
3.	I have enemi usually my t		•	are			l am go leserve	•	fight	for what I	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
4.	I can't say N	o!				1	l'll looi	k out f	for my	self.	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
5.	I am not sure	what	I real	ly wan	t.	1	know	where	I am	going,	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
6.	I let things ge	et in t	he way			I	let go	of wh	at gets	in the way.	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
7.	I don't give n	nyself	enoug	gh cred	lit.	1	сал та	ake it.			
	LOW. 1	2	3	4	5	6	7	8	9	10 HIGH	
8.	I have to do t	hings	my wa	ay.		I	play by	the r	ules.		
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
9	I put myself	down.				· 1	make t	he mo	st of w	vhat I want.	
	LOW 1	2	3	4	5	6	7	8	9	10 HIGH	
10.	I do not have	a go	od trac	k reco	rd.	1	can sha	ape m	y futui	re.	
	LOW 1	2	3	4	5	6	8	9) 1	0 HIGH	
11.	I never seem	to ge	t it rig	ht.		1	contro) what	I am	determined to chns	ge
	LOW 1	2	3	4	5	6	8	ç) 1	10 HIGH	

Sixth Semester

Self-Actualization Needs:

To fulfill my **self-actualization** needs, I have to reach out and help my fellow students in peer counseling.
